FROM THE DIRECTOR'S DESK...

“Time and tide waits for no person” but Sabarmati Samruddhi Seva Sangh, Gandhinagar has been instrumental in engraving an indelible mark on the lives of the people under its care through the various projects in six districts of North Gujarat. Our efforts and interventions with the communities on matters of health, women co-operatives, natural resource management and its related issues are encouraging us to achieve the objectives of the project and to help our brethren to build an identity of their own for a dignified life and healthy life. We have also been able to promote and protect Child Rights in the district of Gandhinagar through children helpline called “Childline 1098” with the support of Childline Foundation, Mumbai which is awarded to us by Union Ministry of Women & Child Development, Delhi.

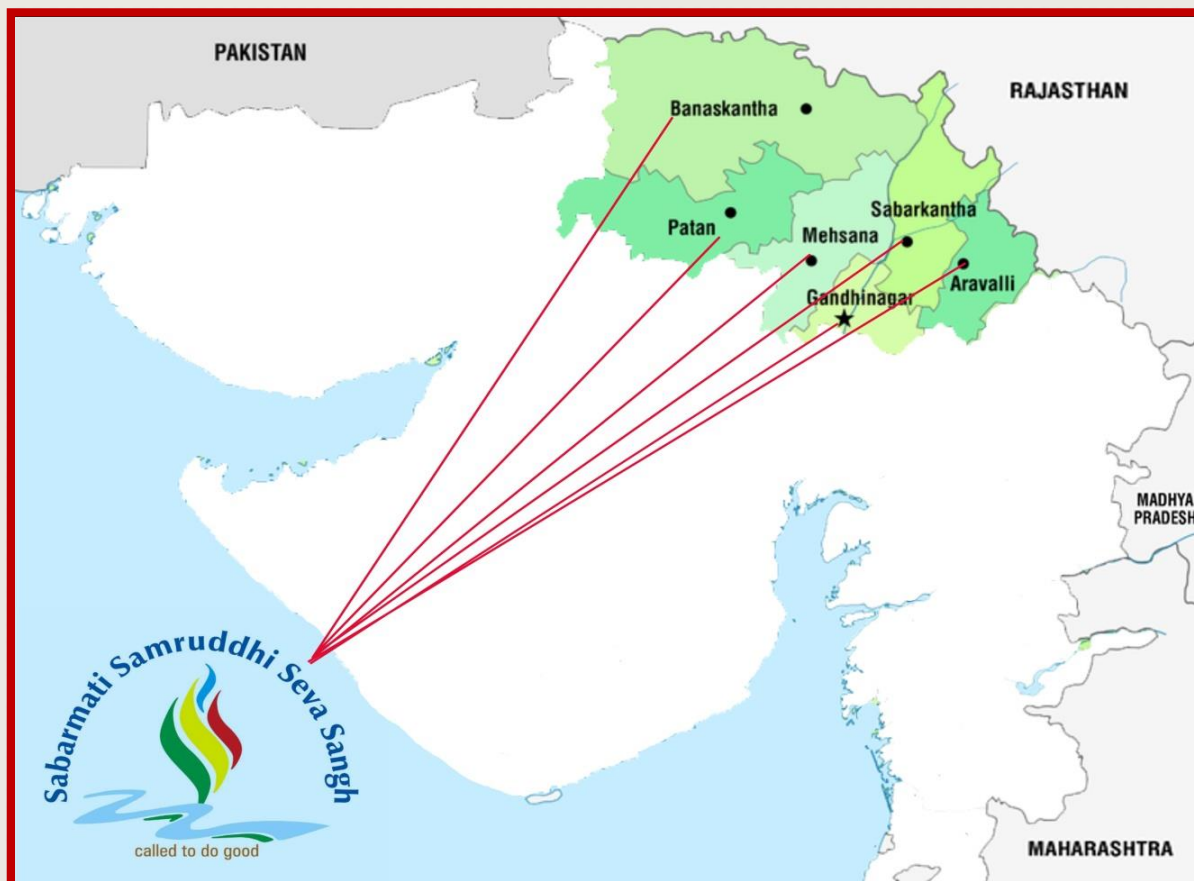

SSSS identifies, selects and imparts trainings to Village Health Workers at grass root level as per the development programs in the areas. Various trainings organized by SSSS have encouraged the community to realize the importance of their participation in planning for their own village development. Local participation holds our confidence high to motivate their resourcefulness and provide required support to meet our objectives. A ray of hope and aspiration has been kindled in the community to become change agents by accessing their rightful entitlements from the government.

All that is said and done at SSSS in the year 2015-16 has been presented in this annual report. We could achieve this because of the support given by our donors - Conferenza Episcopale Italiana, Manos Unidas, Childline Foundation, Caritas India and well wishers. We are grateful to Archbishop Thomas Macwan for his earnest guidance, Operating Partners, VHWs, VHCs, staff and other stakeholders of the project villages for their able participation, implementation and growth. We sincerely look forward for your continuous support and guidance in the days to come. Enjoy the moments with SSSS. Happy reading.

SAFE MOTHERHOOD HEALTHY CHILDHOOD

The project 'Safe Motherhood Healthy Childhood' began in the year 2013 financially supported by Manos Unidas. The base line study was done in 2012 before the project was started. The base line data of 2012 when compared to that of 2015, a striking improvement in the RCH indicators was distinguished. Again RCH data was collated at the beginning of the year 2016 just before the end of the project period. An incredible amount of success was allured through the outcome of the project in not only understanding health related issues by women but also subsequently a behavioral change in the project beneficiaries.

Due to selfless and dedicated services towards awareness by Village Health Workers, 100% result was evolved.

CHILDLINE 1098

*The calls would come late in the night.
"Didi, can you come? There's been a fight at the station."
"Didi, can you help? The police have battered Raju."*

And a CHILDLINE volunteer would get up and rush out to where a street child was waiting. On one of those dashes across the sleeping city, an idea was born. What street children needed was a helpline, their own helpline.

On 1st Aug 2015 "Childline 1098" was started by SSSS to promote Child Protection & Child Rights in the Gandhinagar district. This is an Integrated Child Protection Scheme (ICPS) from the Ministry of Women & Child Development, Government of India in partnership with State Govt., NGOs allied systems and the Corporate Sector. This project has been awarded to Childline India Foundation (CIF), Mumbai who in close network with the implementing partners work for the cause of the children.

Childline is a national 24 hour free, phone emergency outreach service for children in need of care and protection. They say "someone who cares is a phone call away, just dial 1098. When you see a child ill and alone, in need of shelter, begging, abandoned, lost, missing, beaten or abused, working, not schooling, trafficked, transported, in conflict with civil laws, etc. need your support. Such and many other abuses like physical, emotional and sexual, neglect and negligent treatment, exploitation, etc when administered on children, 1098 protects them all.

MOTHER AND CHILD SAFETY

Filled with motherly love & concern for the people at Aravali & Sabarkantha districts "Mother & Child Safety Program" was designed based on the earlier practical experiences and professional expertise by Sabarmati Samruddhi Seva Sangh (SSSS) through the financial aid from Conferenza Episcopale Italiana (CEI), to address some of the health issues of these communities. The Goal of the project that started in September 2015 is that Reproductive and Child Health (RCH) indicators are improved and the communities in three blocks of Sabarkantha & Aravali districts are completely accessing Govt. health services. It envisages that the communities become aware of health issues specially women and manage their health problems on their own. The project is implemented in 18 villages of these two districts through four operating partners. Twenty village health workers (VHWs) are selected and by the end of three years they will be fully trained on health matters and will be available to empower their respective communities. Each village will also have a Village Health Committee (VHC) who will facilitate and link with the Government Local Body called Panchayat and local health units in matters of health related activities so that communities receive their health services appropriately. The project activities are on to fulfill the objectives:

1. *Infant Mortality Rate (IMR) is reduced by 50% from the existing rate.*
2. *Maternal Mortality Rate (MMR) is reduced to 0%.*
3. *Complete ante natal care is increased by 30% from the existing rate.*
4. *Twenty Village Health Workers are fully trained on health issues.*

Based on the above objectives, SSSS has intervened and initiated the formation of 54 health groups which meet every month to attend health education classes as disseminated by VHWs. 18 Village Health Committees(VHCs) are formed and they regularly conduct monthly meetings to discuss health related and other issues of the community and act accordingly. VHWs are regular in maintaining all 12 health registers after having trained in record keeping and documentation training. They involve themselves to support in organizing Immunization day with the nurse of the location. After thorough screening of the health data through the survey conducted gives motivation to VHWs to improve these data. They attend 3 days training at JVK, Pethapur every month to develop their leadership qualities, self confidence and expertise in the field of health through different methods like songs, role plays, games, posters, documentaries, etc. Such methods enable them to organize classes to specific groups that are with them. Various camps are conducted where in 1936 patients received treatment in the General camps, 648 patients got treated in the Immunization camps. For the first time as a focused group 216 VHC members & 20 VHWs visited PHCs & CHCs. While 6480 community members attended 216 awareness programs and gained knowledge on health topics, 1080 of them attended 72 RCH (Reproductive and Child Health) awareness program and gained knowledge on health topics. The project is ongoing and geared to attain 100% target of the objectives to become a routine program of the people than olden times.
